

# Presentation on career oriented goal

BY APURVA AGARWAL

# Introduction- Cybersecurity

Cybersecurity is a dynamic and high-demand field. Your career goals should be structured to build a strong foundation of knowledge and technical skills, followed by specialized expertise.

# Advantages

Exceptional Job Demand and Security 🛡️

Cybersecurity is one of the fastest-growing job markets globally

High Compensation and Earning Potential 💰

Due to the acute talent shortage and the criticality of the work, cybersecurity roles are highly compensated..

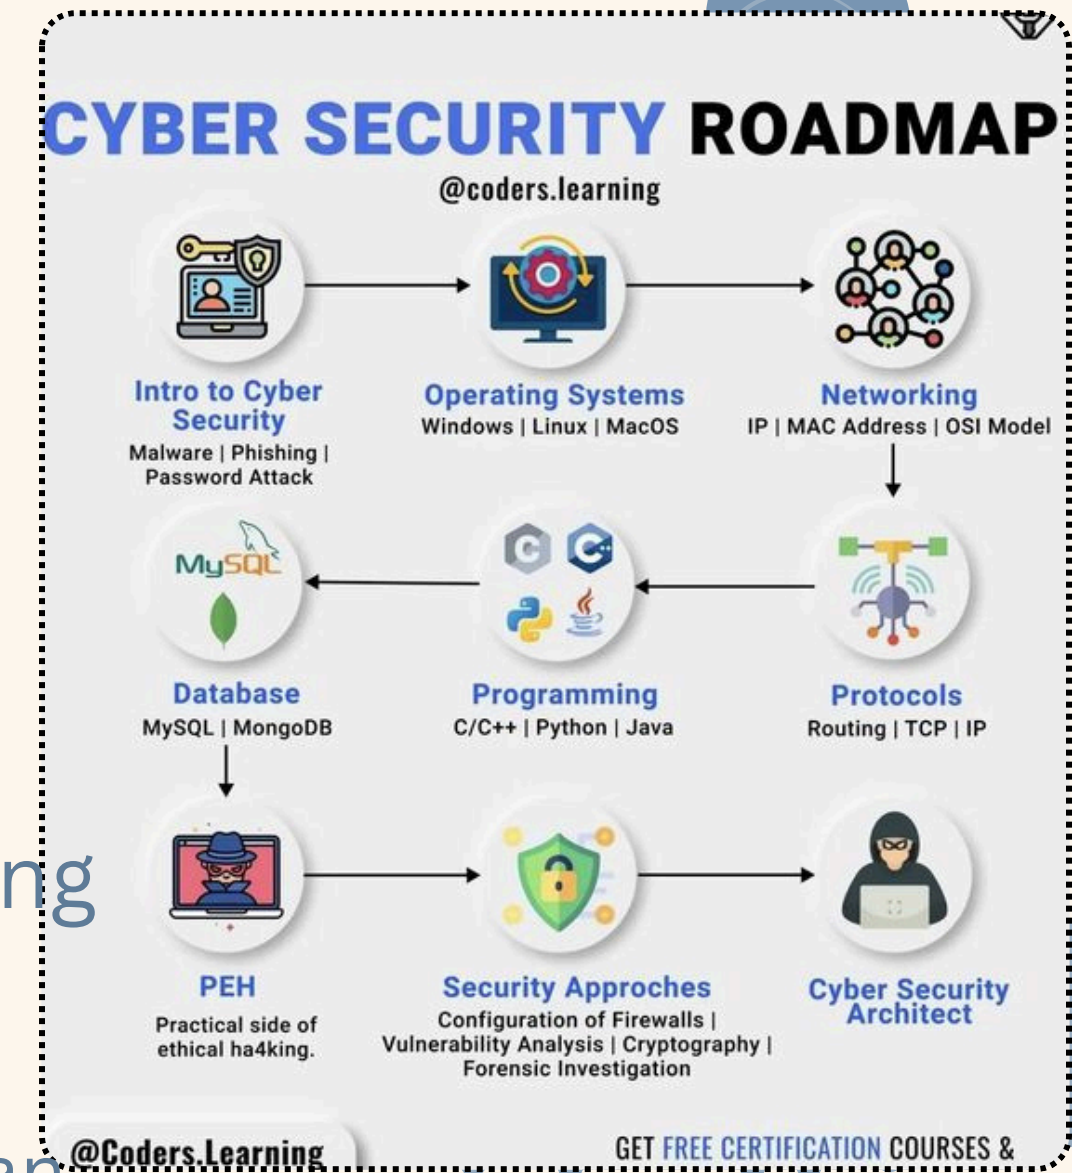

# ROADMAP

Diverse and Challenging Work 🧠

1. The nature of the work is dynamic and constantly evolving, preventing stagnation and requiring continuous learning

2. Build the Foundational IT Knowledge (0-1 Year)  
Before you can secure a system, you must understand how it works. This phase focuses on core IT principles.

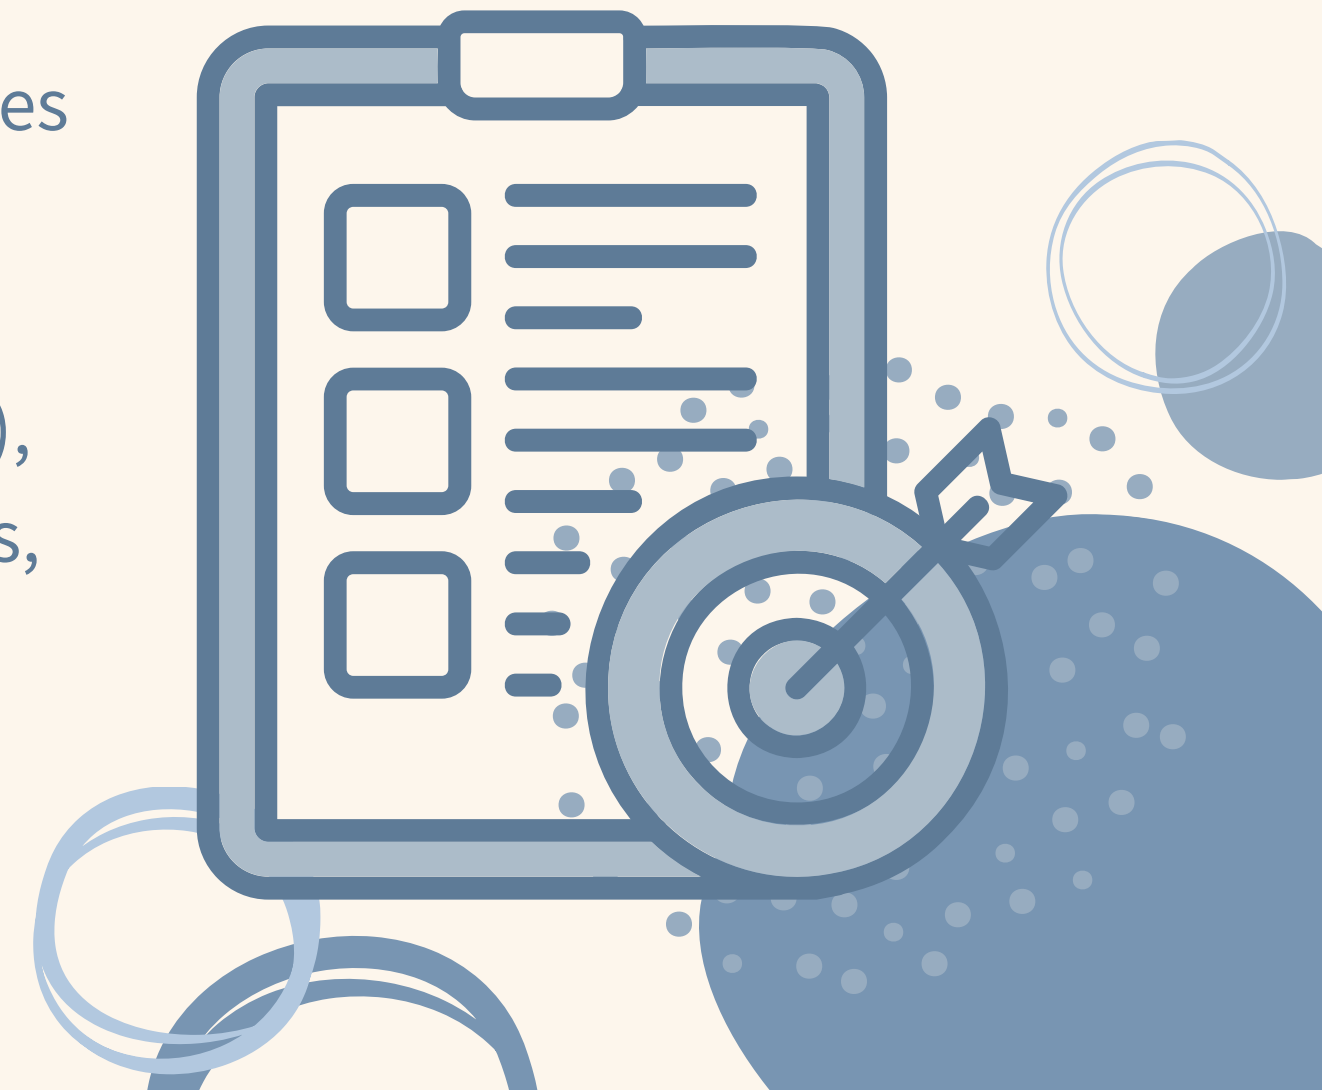

# GOAL

1.

Encryption (for data at rest and in transit), Multi-Factor Authentication (MFA), and strict Access Control lists (ACLs).

Hashing and digital signatures (to verify files haven't been tampered with), file permissions, and robust change management processes.

# THANK YOU!!!
